WEDNESDAY, AUG. 7, 1889.

ARRIVALS.

Aug 7—
 Bk Lady Lamson from San Francisco
 Bk J. L. Harway 137 days from
 Boston
 Stmr C R Bishop from Koolau

DEPARTURES.

Aug 7—
 Schr Halekaka for Pepeekeo
 Bk W H Dimond for San Francisco
 at 1 p m
 Schr Leahi for Kohala
 Schr Luka for Hamakua

PASSENGERS.

From windward ports per stmr Mikahala, Aug 6—G A Neth, Father Ruatui, C L Brito, D M Crowley and wife, Jas Dawson, Mrs Hughes, Miss L. Kookah, Miss Dickenson, Miss Hayselden, H. Riemenschneider, R A Amalu, Mrs. Kalo, and 46 deck passengers.
 For Maui per stmr Likie, Aug 6—Rev H H Gowen, W H Halstead, Rev H Isenberg, J H Dimond and son, V. H. Thum, and about 30 deck.
 For Kaula per stmr Waleale, Aug 6—Mr Justice S B Dole, Hon W O Smith and 2 children, A Rosa and wife, His Ex C W Ashford, Dr Belden, J W Kalua and wife, C E Kingsley, Masters W. H. Field and Chamberlain, C Barnfield, Mrs C O Berger and 2 children, H W And, Miss Payson, A Faye, C M Sproul and about 20 deck.
 For San Francisco per bktm W H Dimond, Aug 7—Mrs L S Bennett, G A Neth, S Mohr, Mrs. Demming and daughter, N L Chace, J Anderson and wife, L W Andrews.

SHIPPING NOTES.

The Brit bk Jas L Harway arrived this afternoon 137 days from Boston, with a general cargo of merchandise consigned to Messrs C Brewer & Co.
 The barkentine W H Dimond, Capt E P Drew, took to San Francisco to-day 6107 bags of sugar, 3523 bags of rice, 2 bags coffee, 744 empty beer kegs, 200 bunches bananas, 4 cases effects. Foreign value \$894; domestic value \$68,061.17.
 The Hawaiian bark Lady Lamson arrived this morning from San Francisco with merchandise valued at \$20,826, including 850 bbls flour, 1933 ctns barley, 113 ctns wheat, 184 ctns canned goods, 1122 lbs tea, 5 ctns salmon, 1015 ctns bran, 31 ctns rice, 330 lbs hay, 72 ctns corn, 50 sks middlings, 4000 lbs tobacco, and 10,063 lb lumber.
 The stmr Mikahala arrived Tuesday afternoon from Maui and Hawaii with 3,020 bags sugar, 161 bags awa, 116 hides, 1 horse, 25 head cattle, 15 pigs, and 64 packages sundries.

SPECIAL NOTICE.

The "Bulletin Weekly Summary" is the last complete newspaper history of the late insurrection to be issued from this office. As there is likely to be a demand for it long after the supply is exhausted, all desirous of having copies for the next mails and for preservation should secure them promptly. The whole edition is about two thousand and a large part of it was bought up this morning for the Dimond's mail. The contents comprise all that appeared in our steamer extra, including the fine illustrations, and all matter appearing later in the daily up to Tuesday. No single sheet issued has so comprehensive a history of the past eventful week.

A FINE ANIMAL.

Hon. A. F. Judd received per W. S. Bowne last month a thoroughbred shorthorn or Durham bull. This animal was bred by J. S. Latimer & Sons at Abington, Illinois, and is named Grand Duke 2nd, 86,798, being registered on page 167 in Vol. 33 of American Short Horn Herd Book. Grand Duke was calved March 6, 1887, and is consequently but two years and five months old. He weighed as he left the cars in San Francisco from San Mateo Co., to be shipped here, 1490 lbs. This bull's sire is Fennel Duke (46070) and his dam is Blooming Heath 5th, (43528), and he counts among his ancestors, Duke of Thorndale 10th, Duke of Gloster, Duke of Hillhurst, Grand Duke 2nd (12961) and Duke of Geneva 7th, of world wide reputation. This bull was sold to Mr. Judd by Mr. Robert Ashburner of Baden Station, San Mateo Co., Cal., who is well known in this country.

AN IRON BUILDING.

The large iron building erected on Queen street by Messrs. G. W. Macfarlane & Co. for the storage of machinery and railway material, was made by Messrs. Mirrieles, Watson & Co., Glasgow, Scotland. Its dimensions are 100ft. long, 40ft wide, and 17 feet high to eaves. It is all iron and entirely fireproof. The floor is of concrete with lines of rails laid to save the floor and facilitate the handling of heavy machinery. There are four large sliding doors. Drays can drive right through, round the west end of the building, and out to the street again without backing. A hand traverse crane running in a travelling box girder is arranged to pick up ordinary pieces or cases from any part of the building. The traveller is carried on 12 inch rolled iron beams placed on top of columns 14 feet high, on the sides of which are bolted other columns or brackets for carrying the roof. This design ensures the stress on the columns of the traveller and its load being always perfectly vertical, and also provides ventilation all round. The total weight of the iron work is 50 tons. There are 16 cast iron columns. The building is an ornament to that part of the town. Its erection was personally supervised by Mr. Robert Catton.

LOCAL & GENERAL NEWS.

A HOMESTEAD on Liliha street is offered for sale.

The busiest man in Kona, Hawaii, all last week was the new doctor.

Rev. H. H. Gowen has left for Maui to enjoy a vacation of four weeks.

The Arion picnic on Saturday promises to be largely attended and a success.

A MEETING of the Honolulu Arion will be held this evening, at the usual time and place.

The U. S. S. Alert was decorated with bunting to-day in honor of the King, who visited the French flag-ship.

THIRTEEN sailors of the U. S. S. Nipic who had broken liberty, were returned on board this afternoon by the police.

Mr. M. M. Williams, referred to in the item, "A Traveled Cake," yesterday, was paymaster and not steward of the British warship.

Rev. George Wallace has announced from the pulpit that he will leave for the States August 30th. His return is indefinite.

The Post Office dispatched to San Francisco by the barkentine W. H. Dimond to-day, 1,149 letters and 1,091 packages of papers.

When the Lady Lamson came into port this morning she had her flag flying at half mast out of respect to the memory of the late Mr. Andrew Welch.

COPIES of the "Proceedings of the Diocesan Synod," at 25 cents each, may be had at the residence of the lay secretary, Mr. C. H. White, No. 4 Emma street.

The King attended by Prince Kahanaloa and Mr. J. W. Robertson, Vice-Chamberlain, visited the French flag-ship Duquesne this morning. The usual salute was fired.

The band on board the French flag-ship Duquesne will give a concert at the Hawaiian Hotel, Thursday evening, commencing at 7:30 o'clock. It is said to be a very fine band, and the concert will no doubt attract a large attendance.

Mr. Gus Neth, the Hawaiian Hotel tenorist, returned from a trip to the Volcano yesterday, and left this morning on the W. H. Dimond for his home in Germany, to be absent about four months. The barber's shop at the Hotel during that time will be in charge of Mr. Gustave Maurer.

The following nine were given to the BULLETIN by J. W. (Gold) as the team to play against the Stocktons, but the latter want to play all the Hawaii League clubs in turn: J. Hay Wodehouse, C. P. Davis, B. Baldwin 3rd b, H. Whitney 2nd b, E. Wodehouse 1st b, G. Lucas ss, A. Lucas rf, Chan. Wilder cf, Friedenburgh lf.

EVENTS THIS EVENING.

Service at Central Union Church, at 7:30.
 Service at St. Andrew's Cathedral, at 7:30.
 Oahu Lodge No. 1, K. of P., at 7:30.
 Mystic Lodge No. 2, K. of P., at 7:30.
 Drill Co. C Honolulu Rifles, at 7:30.
 Meeting Honolulu Arion Society, at 7:30.

FOUR MORE CHARGED.

In the Police Court this morning Thos. Spencer, George Baker, Kahikoa and Wahineau were charged with treason and remanded to the 14th. Spence at the time of his arrest was editor of the Kuokoa newspaper and has written many articles commendatory of the present Government. Baker is a well known hack driver.

A DANGEROUS PLAYTHING.

On Monday afternoon between 4 and 5 o'clock Dr. F. L. Miner received a telephone message to proceed at once to the house of Mr. George Wond on Punchbowl street. Arriving there the doctor found Mr. Wond's son, a boy of about seven years of age, covered all over with blood, a small hole over his right eye and the nose, another just over the heart, two in the end of his thumb, and his right leg and thigh peppered with holes. Upon examination the doctor could find no shot at all. The little fellow said another boy had shot him. Upon looking around a giant powder cartridge was found in the next yard just vacated by C. W. Hart, and from what Dr. Miner tells us it is apparent that the boy had found one, which exploded while he was playing with it. The wounds are not serious and the little fellow will soon be all right.

The idea of a single legislative house, instead of the usual House and Senate, is said to be regarded with considerable favor by the delegates to the North Dakota Constitutional Convention.

THE DAMIEN MEMORIAL.

Speech of the Prince of Wales at Marlborough House.

The following extracts are taken from the London Globe's report of the first meeting of the committee for promoting a memorial to the late Father Damien, which was held on June 17th at Marlborough House and presided over by the Prince of Wales:

The Prince of Wales, in opening the proceedings, said the heroic life and death of Father Damien had not only aroused sympathy in this country, but it had gone deeper; it had brought home to us that the circumstances of our Indian and colonial empire oblige us in a measure to follow his example, not only in regard to foreigners, but in connection with our own fellow-subjects. India, with its 250,000 lepers, and our colonies with their increasing victims to a loathsome disease, had a far stronger claim on our aid than the poor natives of the Hawaiian Islands could ever have on the young Belgian priest who had given his life for them. To mark our debt to him as well as our sympathy with his noble self-sacrifice he proposed to this committee a memorial scheme embracing three objects. The first was a monument to Father Damien on the spot at Molokai where his remains were interred; the second was the establishment of a leper ward in London, probably attached to some London hospital or medical school, and the endowment of a travelling studentship to encourage the study of leprosy; and the third was a full and complete inquiry into the question of leprosy in India, where there were about 250,000 lepers, and no adequate means of dealing with the evil. The first part of this scheme needed no comment; its fitness was manifested immediately it was named. The second part of the scheme required some consideration or explanation. It might be said that there were but few lepers in London, and that these were now treated in the general hospital most convenient for them. But these objections strengthened the argument he submitted to them. A special study of leprosy was acknowledged to be necessary, and the fewer the cases that occurred in this country, the more important it was that they should be studied by specialists. London should be looked upon as the centre of all knowledge. No reason for refusing to establish a leper ward could be urged which might not with equal justice be urged against the founding of a chair of astronomy in London, because few observations could be taken in our misty atmosphere (laughter). But if leprosy were communicable, we ought to seek to limit as far as possible the chance of its spreading. Further, lepers were not welcome patients at the general hospitals; and in the state of doubt which existed as to the infectiousness of leprosy hospital authorities were justified in hesitating to admit lepers to wards open for the treatment of ordinary diseases. Very recently great difficulty occurred in Dublin in dealing with a case of leprosy, that of a soldier just returned from India. Not three years ago a leper had wandered about Folkestone without home or shelter, until a physician gave an order for his admittance to the London Hospital. At the present time a leper, with his hands distinctly infected, was engaged in business in a London meat market. Such facts as these, taken almost at haphazard, showed the necessity for a leper ward in London (cheers).

Mr. E. Clifford, who was introduced by His Royal Highness as the most fitting person to move the first resolution, proposed that a monument to Father Damien should be erected on the spot where his remains are interred. He read an interesting letter from Brother James, giving an account of Father Damien's last moments.

THE general health of the city is good, the death record from natural causes for the past two months being lower than the comparative monthly reports of the past five years.

The work of systematic examination of the city still continues, the result being that the odorless excavator has been kept busy for the past three months. Measles, which made its appearance in June, has been entirely stamped out, the disease being confined to two cases. During the present month, two buildings have been shifted from Kakaako and placed in position at Kalihi. Everything is now in good working order.

POLICE COURT.

WEDNESDAY, Aug. 7.
 J. Holan and Awana had each to pay \$6 for drunkenness.
 Soo Yin, for assault with a deadly weapon, and Peter Quinn, for assault and battery, were both discharged.

SUPREME COURT-AT CHAMBERS.

BEFORE MCULLY J.

WEDNESDAY, August 7.
 In re estate of Hopu (k), late of Kalaawao, Molokai, deceased intestate. Petition of C. A. Brown to be appointed administrator. Partly heard and continued until Aug. 28, 1889. F. M. Hatch for petitioner; J. A. Magoon for Makahia, an heir.

THE CALLIOPE.

The following description of H. B. M. S. Calliope, which survived the naval disaster at Apia, Samoa, will be found interesting: This now famous vessel was built at Portsmouth in 1883, and has a larger proportion of engine power to displacement than vessels of her class. Her displacement is about 2,770 tons, and the engines can develop 3,000 horse-power. The engines were made by J. and G. Renne, of Blackfriars, and are of the horizontal double piston-rod tandem description, with four cylinders, the high-pressure cylinders being of 42 in. diameter, and the low-pressure of 72 in. diameter, with a stroke of 36 in., making about 90 revolutions per minute, at full power with natural draft. The boilers, six in number, are of the ordinary horizontal type, the tubes being in a line with the furnaces, placed in two groups of three boilers, each boiler being 18 ft. 3 in. long by 9 ft. 2 in. diameter, with a total heating surface of 9,254 square feet; working steam pressure, 90 lb. The surface condensers are entirely of gun-metal, with a condensing surface of 6,000 square feet. The engines were made originally very strong throughout, with the view of the addition of increased power by forced draft, and the screw was made on the feathering principle.

PIANO FOR SALE.

ON account of departure from the country a Genuine Fischer Piano will be sold at a bargain. The instrument is nearly new of the upright style, seven and a third octaves and in perfect order. Also, 1 Automatic Sewing Machine, largest size and in perfect condition. Address "E," BULLETIN Office. 319 1w

THE OLDEST DAILY in the Kingdom.

ITEMS FROM KONA.

Three Chinese fell under the penalty of the opium prohibitory statutes at Kailua, Hawaii, on Saturday. Opium smoking. Fifty dollar fines.

School examinations have had their days in Kona as elsewhere. Napoopoo showed up on the 25th and Kona-waena on the 26th. Large attendances of spectators filled the buildings and verandas at both places. The school houses are both new, the one at Napoopoo having been opened for business on the 6th May and the Kona-waena structure in July.

The Napoopoo English school, Mr. N. Logan, teacher, has been in operation since October last. The native Hawaiian parents and guardians in the locality as well as those of Keli have manifested a commendable interest in the English school. They are evidently desirous of giving the young people every possible opportunity of being wiser than the generation of their predecessors. The usual "dialogue, song and recitation" programme was hardly carried out at Napoopoo. The exercises consisted of reading, spelling, practical exhibits in colloquial English, dictation, and arithmetic. The tasks of the third reader distinguished themselves in the oratorical line, each one delivering a speech, not found in the books, on various subjects of local and personal interest. The speeches were in English and had been prepared by the teacher and turned over to the respective orators for preparation three days before the event. All passed off well. At Kona-waena, Mrs. Sunter, teacher, ordinary school work was supplemented by song, dialogue and recitation. Pupils displayed good proficiency in the practical as well as the amusing numbers on the programme.

THE CITY'S HEALTH.

The general health of the city is good, the death record from natural causes for the past two months being lower than the comparative monthly reports of the past five years.

The work of systematic examination of the city still continues, the result being that the odorless excavator has been kept busy for the past three months. Measles, which made its appearance in June, has been entirely stamped out, the disease being confined to two cases. During the present month, two buildings have been shifted from Kakaako and placed in position at Kalihi. Everything is now in good working order.

New York Goes Equitable by a Large Majority.

No better example of the estimation in which this great Company is held, can be given, than by a comparative statement of the business done by itself and its chief competitors in their common home, the city of New York. In New York a man can get his information direct from the Home Office of the largest companies, and has more accurate opportunities of judging their respective merits than anywhere else. As a result in the City of New York during the year 1888 the Equitable wrote a larger amount of new business than was written by its Two Largest Competitors Combined. In the State of New York the Equitable wrote \$1,808,431 more Insurance than the aggregate of its Two Largest Competitors Taken Together. It did the Largest Business in the United States, as well as in the World at a time when all Companies were straining every nerve to pass it.

The reason why this universal verdict goes with the Equitable is on account of the Popularity of its Plans and the Promptness and Fairness of its Business Methods. As the Pioneer in reforms its Policies have been and are being extensively imitated by others, a most graceful tribute to their merit.

The primary object of Life Insurance is to provide ready money against death. No Company can approach the Equitable record for promptness in this regard. The New Policy of the Equitable just out is (like a bank draft) a simple promise to pay and is without condition on its back.
